

Come and build QuizPedia – Home of Quiz Making

All good online products need a decent web presence, and we're no exception. That is why we are looking to extend our team with some highly motivated students. This is your chance to build something big! This opportunity is an investment in your future career.

The Company

We are a fantastic team of developers and designers that are passionate about good performing web software. We are based in Copenhagen – Østerbro, we have good lunch cantina and an even better Coffee machine.

Student jobs and Student intern positions @QuizPedia.com

FULL STACK DEVELOPER:

Is it reasonable to expect mere mortals to have mastery over every facet of the development stack? Probably not, but Facebook can ask for it. At Facebook they only hire 'Full Stack' developers. Well, what does that mean?

To us, a Full Stack Developer is someone with familiarity in each layer, if not mastery in many and a genuine interest in all software technology.

Good developers who are familiar with the entire stack know how to make life easier for those around them.

Some area's you need to have experience with:

- Test-Driven Development
- Understanding of RESTful Services
- Knowledge of Javascript, Ruby
- Rack-based web frameworks
- Rails, Angular, NodeJS

Experience with other platforms is very welcome

FRONTEND WEB DEVELOPER:

In Quizpedia we are using awesome tools and technologies to create our web and mobile apps. We love to follow best practices in our daily work and we are always on the lookout after new stuff that can make our business and applications better. Here is a quick list of some of the JS frameworks, Task runners, Css preprocessors and versioning tools that we use in our daily work:

Angular, Node, GSAP, Webpack, Brunch, Karma, Chai, Protractor, SASS, Stylus, Git, Bitbucket, Coffeescript, ES6

GROWTH HACKER:

If you don't know what it is you are not a Growth Hacker

So if you are interested in any of the jobs above and recognize some of the tools from the list or if you think we are missing the coolest thing and you want to work with a small dedicated and professional team. Then make some noise and we can setup a meeting. Contact Stephan Stephensen on info@quizpedia.com

Layers of the full stack:

- Server, Hosting and Network Environment
- Data Modeling
- Business Logic
- API Layer / Action Layer / MVC
- User Interface
- Understanding what the customer and the business needs.
